AQUATOOLS ACHIEVES THE ECOVADIS PLATINUM MEDAL!

In January 2025, AQUATOOLS reached a new milestone by obtaining the EcoVadis Platinum medal, a prestigious distinction that places the company among the top 1% of companies evaluated in its sector. With an overall score of 82/100, AQUATOOLS reinforced its commitment to Corporate Social Responsibility (CSR), achieving a distinction in the “Environment” category, where it attained an exceptional score of 92/100.

INTERNATIONAL RECOGNITION

This Platinum medal, resulting from AQUATOOLS’ third participation in the EcoVadis assessment, illustrates the company’s constant progress in terms of CSR. After a gold medal in 2024 with a score of 73/100, this new level demonstrates the excellence of its practices in terms of sustainability and ethics.

A global reference in CSR assessment, EcoVadis awards scores based on four criteria: environment, social and human rights, ethics and responsible purchasing. Each score, rated out of 100, reflects the quality of CSR management at the time of the assessment.

To date, more than 150,000 companies in 185 different countries have been assessed by EcoVadis. Each assessment is tailor-made according to the size, sector of activity and location of the company.

The criteria are aligned with international CSR standards such as the principles of the UN Global Compact, the ISO 26000 standard and the conventions of the International Labour Organization (ILO).

EXEMPLARY ENVIRONMENTAL COMMITMENT

Certified ISO 14001:2015, AQUATOOLS stands out as a model of sustainability thanks to innovative and responsible initiatives. Its score of 92/100 in Environment reflects its constant efforts to reduce its ecological footprint, promote sustainable resource management and to actively contribute to the fight against climate change.

This medal is the result of a long-term commitment to improve our policies and actions. It reinforces AQUATOOLS’ determination to move towards excellence in sustainability, motivating it to redouble its efforts and to continue this momentum with the desire to further push CSR standards.

About AQUATOOLS

AQUATOOLS is a French company specialising in the production of advanced solutions for water hygiene, in particular anti-legionella and all-germ point-of-use filters for healthcare facilities and non-medical establishments open to the public (hotels, accommodation, campsites, etc.).

Thanks to sustained investment in Research and Development, and close collaboration with scientific experts, AQUATOOLS has quickly established itself as a key player in the point-of-use filtration sector.

The exceptional quality and performance of our filters position us, today, as a market leader in France and a leading player on the international scene, with subsidiaries opening in the United States in 2017, in the United Kingdom in 2023, and in Germany in 2024. Committed to sustainability, we are determined to develop responsible practices that reflect our deep commitment to social responsibility and the environment, as evidenced by our recent distinction with the EcoVadis platinum medal.
